

Ali bodo zmage vredne več?

Objavil(a) Krjavelj - 12.08.2010 13:16

Na kongresu se obeta delavnica na temo "Kako poudariti zmage v modernem računalniškem času". Vsaj tako osebno razumem del nagovora predsednika ICCF. Ali ga vi tudi tako?

Dear Delegates:

In less than two months from now, we will meet for the annual ICCF Congress that will be held for the first time in Turkey.

I hope that most of you will be able to attend or if not send a proxy: it is important that your ideas, proposal for the future of ICCF will be represented and defended.

The usual well documented reports prepared by ICCF Officials have been sent to you for your consideration before being discussed during Congress.

Rather than going over each and every report I will first refer to three areas where I consider that significant progress have been made and important results have been achieved, not only during last year but over many years in a continuous improvement scheme, leading to what I consider the three pillars of ICCF.

But we need also to consider areas where we need to increase our efforts and do much better than in the past and I will also refer to three areas that will become our main focus for our next year actions.

In the last section, I would like to introduce the theme of this year brainstorming session of the Congress' Sunday afternoon: how to emphasize the wins in modern, computer age, correspondence chess?

I wish to see you all in Antalya beginning of October.

Amici Sumus.

Eric Ruch

ICCF President.

Ja, želijo bolj poudariti zmage. Morda tako, da bo zmaga vredna 3 točke, remi 1 točko, poraz pa 0 točk.

Tako se že ponekod igra tudi na OTB turnirjih.

Osebnostno bi ne imel nič proti takemu pristopu, potem bi se seveda splačalo igrati malo bolj agresivno in malo bolj riskantno.

Skrajni čas je za stimulacijo aktivnejšega igranja :)

Zmaga s črnimi bi morala veljati 3 pike, z belimi 2 pike, remi 1 pika

Po tem tvojem predlogu imajo črni (po mojem) preveliko prednost, zmaga belega pa je že zdaj vredna dva remija. Zato se mi zdi bolje 3; 2,5; 1

Sklep zbora SLO CORR 2010:

Ker se bo na delavnici ICCF zagotovo odvijala debata okrog stimulacije 3 točke za zmago in ena točka za remi, je potrebno delegate opozoriti na možnost manipulacije povezanih igralcev.

Npr. Trije igralci iz iste države se dogovorijo in namesto verjetnih 3 remijev, dobi vsak po eno partijo in vsi imajo točko več kot bi jih imeli sicer.
